Professional Profile

Healthcare transformation and business improvement professional with more than seven years' experience progressing from frontline care delivery through operational leadership, deployment and adoption, business analysis and enterprise transformation across Australia's healthcare sector.

My experience spans aged care, home and community care, allied health, community nursing, mental health and customer service, providing practical understanding of healthcare operations, workforce capability, customer experience and technology-enabled transformation across operational and strategic environments.

I partner with operational, business, technology and project teams to improve service delivery, simplify processes and translate business needs into practical, sustainable solutions that strengthen organisational performance and improve outcomes for customers, workforces and healthcare organisations.

This résumé provides an executive summary of my experience. Comprehensive project case studies, capability frameworks, leadership recommendations and examples of my work are available at ashleadavies.au

Leadership feedback and recognition: ashleadavies.au/recommendations

Professional Experience

Australian Unity 2019 - 2026

Progressed through operational, leadership, deployment and transformation roles across Australian Unity's Home Health business, developing end-to-end experience spanning frontline healthcare operations, workforce and service delivery, enterprise deployment, technology transformation and business analysis.

DEPLOYMENT CONSULTANT | Home Health

Jan 2023 – Jun 2026

Led and supported enterprise deployment, operational readiness and implementation activities across complex Home Health transformation initiatives. Worked across operational, project, technology and leadership teams to assess readiness, identify risks and dependencies, coordinate implementation activities and support sustainable adoption. Experience included Salesforce Health Cloud transformation, operating model integration, enterprise data remediation across 45,000+ customer and 3,000+ employee records, workforce and service integration, training, stakeholder engagement, governance and post-implementation remediation to maintain operational and customer service continuity.

Career assignments during this role

BUSINESS ANALYST | Technology, Digital & Transformation

Jan 2026 – Jun 2026

Worked within the Technology, Digital & Transformation Home Health Squad, supporting business, operational and technology initiatives across the Australian Unity Home Health platform, including Remedy Healthcare. Led discovery, requirements elicitation, stakeholder engagement, current and future-state process mapping, change impact analysis, data analysis, UAT and implementation readiness across customer experience and technology transformation initiatives. Worked collaboratively with operational leaders, architects, developers, vendors and subject matter experts to translate business needs into practical solutions. Established a Business Analysis Community of Practice to strengthen collaboration, knowledge sharing and BA capability.

DEPLOYMENT & ADOPTION LEAD | Home Health

Apr 2024 – Oct 2024

Led deployment and adoption for the Team-Based Care operating model transformation across 26 Home Health branches, coordinating deployment planning, operational readiness, workforce transformation, governance, executive reporting, communication, training and change adoption. Partnered with operational leaders, frontline teams and project stakeholders to assess organisational readiness, workforce capacity, competing initiatives, risks and dependencies and translate significant workforce and technology change into practical implementation activities. Monitored adoption through operational data, workforce insights, stakeholder feedback and implementation outcomes, identifying adoption barriers and coordinating targeted training, coaching, communication and remediation where required. Coordinated change sequencing, workforce optimisation and new ways of working while balancing operational capacity, service continuity, competing priorities and change impacts.

COMMUNITY LIAISON MANAGER | Home Health

Feb 2022 – Jan 2023

Managed a dedicated aged care customer caseload while supporting service delivery across Western Plains and Far West operations and relieving in Branch Manager responsibilities. Led and supported care workers across workforce scheduling, capacity, recruitment, onboarding, performance, training and capability while coordinating allied health, community nursing and third-party services. Managed complaints, escalations and customer and employee journeys, monitored service gaps and workforce demand and supported quality, compliance and continuity of care. Provided operational leadership through the COVID-19 pandemic, balancing rapidly changing workforce, customer and service delivery requirements.

SERVICE COORDINATOR | Home Health

May 2019 – Feb 2022

Coordinated end-to-end aged care service delivery across customer needs, workforce allocation, scheduling and continuity of care. Managed workforce supply and demand, raised vacancies, participated in recruitment and interviews, onboarded employees and monitored mandatory training and workforce capability. Supported care worker performance, award and enterprise agreement requirements, customer onboarding and ongoing service delivery while coordinating allied health, community nursing and third-party providers where internal capacity could not meet customer needs.

EARLIER HEALTHCARE & COMMUNITY SERVICES EXPERIENCE

Community Care Coordinator | LiveBetter | 2018–2019

Aged care and community service coordination, customer caseload management, workforce scheduling and on-call support, allied health and community nursing coordination and continuity of care.

Disability Support Worker | CareWest / LiveBetter | 2016–2018

Assistant in Nursing | Warren GWAHS | 2015–2017

Residential aged care.

Diversional Therapist | Gilgandra GWAHS | 2016–2017

Residential aged care.

Selected Project Portfolio

A summary of selected projects. Comprehensive case studies and supporting artefacts are available at ashleadavies.au.

Operating Model Transformation

Role: Deployment Consultant → Deployment & Adoption Lead

Led deployment and adoption of the Team-Based Care operating model across 26 Home Health branches, coordinating operational readiness, workforce transformation, change sequencing, training, adoption monitoring and implementation support.
