PROFESSIONAL PROFILE

Healthcare transformation and business improvement professional with 15+ years' experience spanning frontline healthcare, community service operations, operational leadership, enterprise deployment, change and adoption, and business analysis.

Progressed from residential aged care and direct service delivery into service coordination and operational leadership before moving into enterprise transformation. This provides practical end-to-end understanding of how technology, workforce models, processes and operating structures affect customers, employees and service delivery.

Most recently delivered enterprise transformation across Australian Unity's Home Health business, leading and supporting complex initiatives across operational readiness, deployment and adoption, workforce optimisation, business analysis, data remediation, customer experience and technology-enabled transformation. Experienced partnering across operational, clinical, business, technology, project and vendor teams to translate complex needs into practical, sustainable solutions.

Detailed project case studies, measurable outcomes, capability frameworks and leadership recommendations are available at ashleadavies.au

CORE CAPABILITIES

2026 | Proactive Risk Management Award

Recognised with a \$500 organisational award for proactively identifying operational risks that improved customer, employee and organisational outcomes.

Leadership feedback and recognition: ashleadavies.au/recommendations

PROFESSIONAL EXPERIENCE

AUSTRALIAN UNITY | 2019–2026

Progressed through operational, leadership, deployment and transformation roles across Australian Unity's Home Health business, developing end-to-end experience spanning healthcare operations, workforce and service delivery, enterprise deployment, technology transformation and business analysis.

DEPLOYMENT CONSULTANT | Home Health | Substantive Role | Jan 2023 – Jun 2026

Led and supported enterprise deployment, operational readiness and implementation activities across complex Home Health transformation initiatives.

Partnered across operational, project, technology and leadership teams to assess readiness, identify risks and dependencies, coordinate implementation activities and support sustainable adoption.

Delivered operational readiness across Salesforce Health Cloud transformation, operating model integration, acquisitions and workforce/service integration, enterprise data remediation, training, stakeholder engagement, governance, deployment and post-implementation remediation.

Scale & impact: 53+ neighbourhood deployments | 45,000+ customer records | 4,000+ employees across service delivery

BUSINESS ANALYST | Technology, Digital & Transformation | Secondment | Jan 2026 – Jun 2026

Delivered business analysis across customer experience, operational and technology transformation initiatives within Australian Unity's Home Health business, including Remedy Healthcare.

Led discovery, requirements elicitation, stakeholder engagement, current and future-state process mapping, data analysis, change impact assessment, UAT and implementation readiness. Partnered with operational leaders, architects, developers, vendors and subject matter experts to translate business needs into practical technology and process solutions.

Established a Business Analysis Community of Practice to strengthen BA collaboration, knowledge sharing, consistency and capability.

DEPLOYMENT & ADOPTION LEAD | Home Health | Secondment | Apr 2024 – Oct 2024

Led the Deployment Analyst and DRSWAT stream within the Team-Based Care operating model rollout across 26 neighbourhoods supporting 33,000+ customers.

Directed neighbourhood readiness, workforce preparation, training, go-live and adoption activities while working closely with the Program Manager, Change Manager, Technology Lead, TCACO Lead, Branch Deployment Leads, TC+ optimisation team and specialist communications and data resources.

Assessed workforce capacity, EBA and award requirements, employee availability, contracted hours, service demand, data quality and operational risks while maintaining continuity of care and alignment with future Salesforce Health Cloud requirements.

Scale & impact: 26 neighbourhoods | 33,000+ customers | ~12,000 scheduling files per fortnight | Biarri workforce optimisation

COMMUNITY LIAISON MANAGER | Home Health | Feb 2022 – Jan 2023

Managed an aged care customer caseload while supporting service delivery across Western Plains and Far West operations and relieving in Branch Manager responsibilities.

Led and supported care workers across workforce scheduling, capacity, recruitment, onboarding, performance, training and capability while coordinating allied health, community nursing and third-party services.

Managed complaints and escalations, customer and employee journeys, workforce demand and service gaps while supporting quality, compliance and continuity of care. Provided operational leadership through the COVID-19 pandemic while balancing rapidly changing workforce, customer and service delivery requirements.

SERVICE COORDINATOR | Home Health | May 2019 – Feb 2022

Coordinated end-to-end aged care service delivery across customer needs, workforce allocation, scheduling and continuity of care.

Managed workforce supply and demand, vacancies, recruitment and interviews, employee onboarding, mandatory training and workforce capability. Supported care worker performance, award and enterprise agreement requirements, customer onboarding and ongoing service delivery.

Coordinated allied health, community nursing and third-party providers where internal capacity could not meet customer needs, supporting continuity of care across regional operations.

EARLIER HEALTHCARE & COMMUNITY SERVICES EXPERIENCE

Community Care Coordinator | LiveBetter | 2018–2019

Coordinated aged care and community services across HCP, CHSP, fee-for-service and brokerage arrangements, managing customer activities and budgets, implementing services and coordinating workforce delivery. Rostered and supported a workforce of 60+ employees and provided on-call operational support across community services.

Disability Support Worker | CareWest / LiveBetter | 2016–2018

Supported people with disability with personal care, daily living, community participation, medication administration, independence and individual goals.

Assistant in Nursing | Warren GWAHS | 2015–2017

Delivered direct patient and residential care, clinical observations and documentation while supporting people with complex health conditions including dementia, Parkinson's disease and diabetes.

Diversional Therapist | Gilgandra GWAHS | 2016–2017

Planned and delivered individualised leisure and wellbeing programs, assessed individual abilities and needs and adapted activities to support participation, social connection and wellbeing.

Assistant in Nursing | Emily Gardens, The Rock | 2011–2014

Residential aged care providing person-centred personal and clinical care, including activities of daily living, mobility and transfers, vital signs, blood glucose monitoring, infection control, skin integrity and pressure care, wound care, documentation and recognising and reporting changes in resident condition.

SELECTED PROJECT PORTFOLIO

Team-Based Care Operating Model | Deployment Consultant → Deployment & Adoption Lead

Led the Deployment Analyst/DRSWAT stream within a complex cross-functional Team-Based Care rollout across 26 neighbourhoods supporting 33,000+ customers, coordinating operational readiness, workforce optimisation, training and frontline adoption.

[View case study >](#)

Enterprise Home Health CRM Transformation | Deployment Consultant

Delivered operational and data readiness for a phased Salesforce Health Cloud transformation spanning Home Health, Community Nursing and Allied Healthcare, including 45,000+ customer records, 4,000+ employees and 53+ neighbourhood deployments.

[View case study >](#)

Customer & Workforce Integration | Deployment Consultant

Supported the integration of an acquired healthcare provider across 40+ neighbourhoods, coordinating operational readiness and customer, employee and service migration while maintaining continuity of care.

[View case study >](#)

Genesys IVR Enhancement | Business Analyst

Delivered business analysis and operational readiness for the redesign and deployment of a Genesys Cloud IVR integrated with Salesforce CTI, spanning discovery, requirements, UAT, production validation and go-live readiness, with zero critical production defects.

[View case study >](#)

Enterprise UAT & Release Readiness | Business Analyst

Designed and implemented an Excel-based UAT framework enabling external partners and internal testers without Jira access to participate in enterprise testing. Created a collaborative process for test execution, evidence capture, defect tracking and stakeholder ownership, then consolidated relevant testing outcomes and defects into Jira to maintain alignment with internal defect management and release readiness processes.
