Professional Profile

Healthcare operations and business improvement professional with more than seven years' experience progressing from frontline care delivery through operational leadership, deployment, business analysis and enterprise transformation across Australia's healthcare sector.

My experience spans aged care, home and community care, allied health, community nursing, mental health and customer service, providing a practical understanding of healthcare operations, workforce capability and customer experience across both operational and strategic environments.

I partner with operational, business, technology and supplier teams to improve service delivery, simplify processes and deliver practical, sustainable solutions that strengthen organisational performance and improve outcomes for customers, workforces and healthcare organisations.

This résumé provides an executive summary of my experience. Comprehensive project case studies, capability frameworks, leadership recommendations and examples of my work are available at ashleadavies.au
